

Project 2: 100 points total

**Overall Documentation (45):**

**Presentation (20):**

- If there is any update/change of the original database submitted for Project 1, it needs to be addressed (no points deducted if no changes, additional points deducted if no address to new changes)
- Articulate and demonstrate your API addressing the required features (stored procedures, user authentication, role-based access control, indexes, views, triggers)

**Written Report on the System (Word doc) (20):**

- Need to illustrate and walk through the system
- Support any missing components of the system

**System modification, if any (5):**

- Address any updates/changes to your database (if there is any) in detail (no points deducted if no changes, additional points deducted if no address to new changes)
- UML Data Model
- ER Diagram

**System (55):**

- Database creation (if there is anything new): 0
- API/Stored procedures: 20
- User authentication/ Role-based access control: 15
- Tables for audit trail (triggers): 10
- Indexes: 5
- Views: 5
